Scope of Work Narrative

The City of Rockville is going to be rehabilitating their water tank located at 13890 Glen Mill Road Rockville, MD 20850, .2 miles from Veirs Drive and Glen Mill Road. The City will start this process early 2017. While the City is going through that process AT&T must remove the existing communications equipment and temporarily relocate to a Lite Site (Temporary Tower) in order to maintain E911 services to the area. This project will not cause any ground disturbance or require any tree removal. We anticipate the Temporary Tower being up for 6-8 months, once the tank rehabilitation is complete AT&T will return to the newly refurbished water tank.

In compliance with the City's Zoning Ordinance, an Area Meeting was held to provide nearby community members an opportunity to become fully aware of our development intentions and to give those that were within the required notice area an opportunity to provide input into the proposed development.

At this meeting will made every effort to illustrate how the property will be developed and answer any questions. There were a total of 118 notification letters sent out and only 5 residents appeared at the meeting. One of the residents asked that we notify Lakewood Elementary which has been done.

Should you have any questions please contact Justin Barlow, contact info below.

Sincerely,

**Justin Barlow | Real Estate Manager on behalf of AT&T**
