

## NEIGHBORHOOD ADVISORY

### SURVEY NOTICE PROPOSED SIDEWALK Dawson Avenue and North Van Buren Street

#### Sidewalk Construction

In support of our goal to enhance pedestrian accessibility, safety and mobility, the City of Rockville plans to install a new concrete sidewalk at the corner Dawson Avenue and North Van Buren Street. A map showing the proposed sidewalk is on the reverse side of this advisory.

**A survey crew will be in your neighborhood during the week of December 7 to collect field data.** This project includes installation of a five-foot sidewalk with a six-foot wide grass buffer on the south side of Dawson Avenue, between the existing sidewalk and North Van Buren Street. The proposed sidewalk will continue on North Van Buren Street, from Dawson Avenue to the existing sidewalk, with a two-foot wide grass buffer.

In addition to the new sidewalk, handicapped-accessible ramps will be installed at the intersection and some driveway aprons may be reconstructed to allow for handicapped accessibility. Any trees removed during the course of this work will be replaced per the City's *Street Tree Master Plan*. Construction will not begin until next spring, at the earliest. You will receive a notice with more information and a construction schedule two weeks before work begins.

#### Project History

This project was initiated in response to residents' requests to construct sidewalks where they are missing. This project is consistent with the Mayor and Council Vision Statement, *Distinct Neighborhoods, One City*.
