

# Grease Haulers Servicing the City of Rockville's Food Service Establishments (FSE)

There are two types of grease waste haulers

- Waste oil re-users – bio diesel /animal feed– accept the vegetable oil from fryers and reuses it. They may pick up the oil for free or give you a percentage of the proceeds gained from fuel sales.
- Waste haulers – disposal – will pump out grease interceptors and traps. Charge a fee generally based on type of interceptor and amount of fats, oil and grease.

Below is a list of grease haulers that service the City of Rockville. *The City of Rockville does not guarantee accuracy on the information listed below because company procedures and pricing could change without notice. (Last updated January 2012).*
