# POLICE CRIME REPORT

## RECOGNIZE HEAT EXHAUSTION

---

As we approach record-hot weather, knowing the symptoms of heat exhaustion ahead-of-time will allow for a quicker reaction in a confusing and dangerous situation.

- Even in a brutally hot day, someone with heat exhaustion will have **cool, moist skin filled with goosebumps**
- Someone with heat exhaustion may feel **faint, dizzy**, and may have a **weak and rapid pulse**
- A person with heat exhaustion may experience **nausea, a headache, and muscle cramps**

If you or someone you know shows these signs, stop all activity, rest in a cooler place, and drink cool water or a sports-drink.

Find medical care if these symptoms don't improve within one hour and immediately if the exhausted person becomes confused or agitated, loses consciousness, or is unable to drink.
