POLICE CRIME REPORT

ONE PILL CAN KILL: BE AWARE OF COUNTERFEIT PRESCRIPTION PILLS

You may already know of the seriousness of opioid abuse this coming National Recovery Month, but did you know that counterfeit pills are a growing source of death in the United States?

These drugs have exploded in prevalence**: in 2021, the DEA seized more fake pills laced with fentanyl than the previous 2 years put together**.

DEA lab testing has also revealed that **4 out of every 10 pills with Fentanyl contain a potentially lethal dose**. Criminal drug networks mass-produce counterfeit pills to look like prescription drugs like Oxycontin, Percocet, Vicodin, Xanax, and Adderall.

These fake pills are widely available on social media and have been identified in all 50 states and DC.

See photos, learn street-names, and find resources about counterfeits pills with the US Drug Enforcement Administration by clicking here.
