The City of Rockville Sports Division has provided concussion awareness information on the last page of this document and on our website at [www.rockvillemd.gov/recreation/sports](http://www.rockvillemd.gov/recreation/sports). Please review and become familiar.

Any participant who may appear to have or has a concussion may not return to play until the Sports Division has received a note from the participant’s doctor that states the participant has been approved to continue sport activity. The note must be received prior to the next league activity. This includes all practices and games. City of Rockville staff has the authority to sit a participant out of the sport activity if any signs/symptoms of concussion are noticed. The purpose of this policy is to keep all participants safe and healthy.

What are the Signs and Symptoms of Concussion?

Most people with a concussion recover quickly and fully. But for some people, symptoms can last for days, weeks, or longer. In general, recovery may be slower among older adults, young children, and teens. Those who have had a concussion in the past are also at risk of having another one and may find that it takes longer to recover if they have another concussion.

**Symptoms of concussion usually fall into four categories:**

 <b>Thinking/ Remembering</b>	 <b>Physical</b>	 <b>Emotional/ Mood</b>	 <b>Sleep</b>
-Difficulty thinking clearly	-Headache -Fuzzy or blurry vision	-Irritability	-Sleeping more than usual
-Feeling slowed down	-Nausea or vomiting -Dizziness	-Sadness	-Sleep less than usual

-Difficulty concentrating	-Sensitivity to noise/light -Balance problems	-More emotional	-Trouble falling asleep
-Difficulty remembering new information	-Feeling tired, having no energy	-Nervousness or anxiety	

Some symptoms may appear right away, while others may not be noticed for days or months after the injury, or until the person starts resuming their everyday life and more demands are placed upon them. The signs and symptoms of a concussion can be difficult to sort out.

#### **Danger Signs in Adults**

- Headache that gets worse and does not go away.
